**SOURCE:**

1. Research in the chemical-pharmaceutical field in East Germany was controlled by the Zentralamt fuer Forschung und Technik, located in Berlin. The leading personnel in this office were Dr. Foerster and Dr. Pannig. The office chose and approved research projects from those suggested by individual research workers, and limited the amount of money allotted to the accepted projects. This procedure had been used since 1950. Prior to 1950, the individual plants carried on their research work independently, according to their particular aims and available facilities.
2. Research finances were provided independently of the plant's calculation of costs and distributed by the Investitionsbank. Suggestions for research programs for the coming year together with an estimate of financial requirements were to be submitted in August 1953. The final decision concerning the amount of money awarded will be made by the so-called "Ministerrat" after numerous committee meetings.
3. The amount of money approved for research for the Arzneimittelwerk Dresden (AWD) for the year 1953 was 1,060,000 DM East, 10 per cent of which can be used for obtaining apparatus and supplies.
4. The chemical-pharmaceutical industry included in the "Pharma" group was able to obtain 10-12 million East marks for research work. This amount was divided among the following:
  - a. Schering, Berlin-Adlershof. Works director: Siegfried.  
Scientific Chiefs: Dr. Krauss and Prof. Ohle.
  - b. Jenapharm, Jena. Works director and Scientific Chief: Prof. Knoell  
Co-workers: Drs. Elsaesser, Orczickowski and Kochler.
  - c. Arzneimittelwerk Dresden (AWD). Works director: Dipl. Ing. Kraft.  
Scientific Chief: Dr. Thren; Co-workers: Drs. Rotho, Siebeck, Seidel, and Naumann
  - d. BtK, Cranzburg. Works director: Traegner.

CLASSIFICATION: SECRET/CONTROL - U.S. OFFICIALS ONLY
